

SMART CLEAR PROJECTOR SCREEN PAINT

APPLICATION GUIDE

Smart Clear Projector Screen Paint is suitable for use on painted plaster, wallboards, wood, metal concrete and composites. For interior use only.

Each kit covers an area of 4.5m² / 48 sq. ft. This will create the following screen sizes: 120" or 279cm x 157cm (109.8" x 61.8") - at aspect ratio 16:9

All products within the Smarter Surfaces Projection Range have a certified gypsum Surface Finish Quality Standard of Level US 5/ EU Q4 guaranteeing a smooth, seamless surface ready for use with a high-quality projector for professional projection results.

HOW TO APPLY SMART CLEAR PROJECTOR SCREEN PAINT

Please note this product is designed to be applied over a painted surface such as a wall or a coated material which is smooth and non absorbent, and does not apply to an absorbent material such as unpainted bare plaster, wood or concrete

Smart Clear Projector Screen Paint is designed to work with interactive, HD, 4K, and standard projectors with adjustable colour correction. Adjust your projector colour correction settings to display images correctly on your wall colour..

1 PREPARE THE SURFACE

- All surfaces to be painted should be clean, dry and free from loose materials.
- If the surface is new, paint the surface such as a wall in the colour of your choice and allow it to fully dry.
- Measure the area you wish to paint your clear projector paint over and mark it using masking tape. The maximum dimensions this paint will cover is 279cm x 157cm (109.8" x 61.8").

TIP: Paint the entire wall so the area with projector paint will be less visible.

2 APPLY THE PROJECTOR PAINT

- Stir paint thoroughly before use.
- For best results, apply paint using a mohair or lint free short pile roller sleeve.
- Apply 2 coats allowing the first coat to dry once applied.
- Once the first coat is dry (approx. 2-4 hours at 20°) apply the second coat.

3 DRYING TIME

- Smart Clear Projector Screen Paint will be touch-dry in 1 hour and usable after 24 hours.
